

Most cardiac surgical operations require cardiopulmonary bypass to support the patient's hemodynamic needs. National registries lack detailed information concerning the management of cardiopulmonary bypass. In this context, the PERForm registry serves as the foundation for collaborative learning and improvement. The registry is organized within the Michigan Society of Thoracic and Cardiovascular Surgeons Quality Collaborative and is the official of AmSECT, the largest society of perfusionists in the world.

45 hospitals

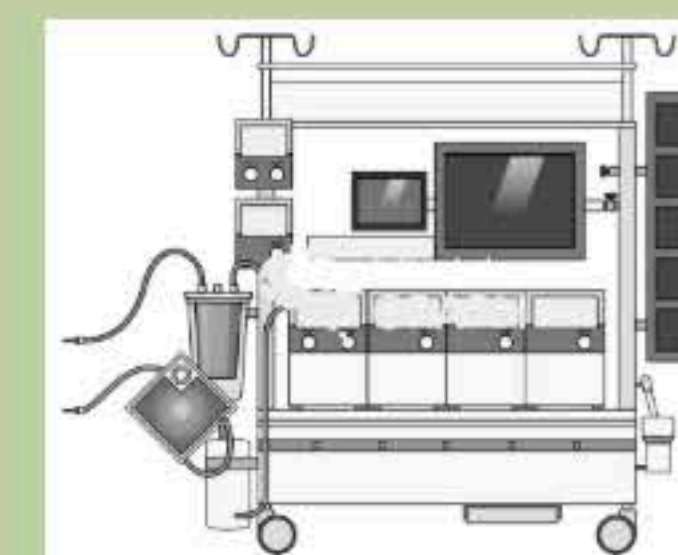

12 States

120 Surgeons

208 Perfusionists

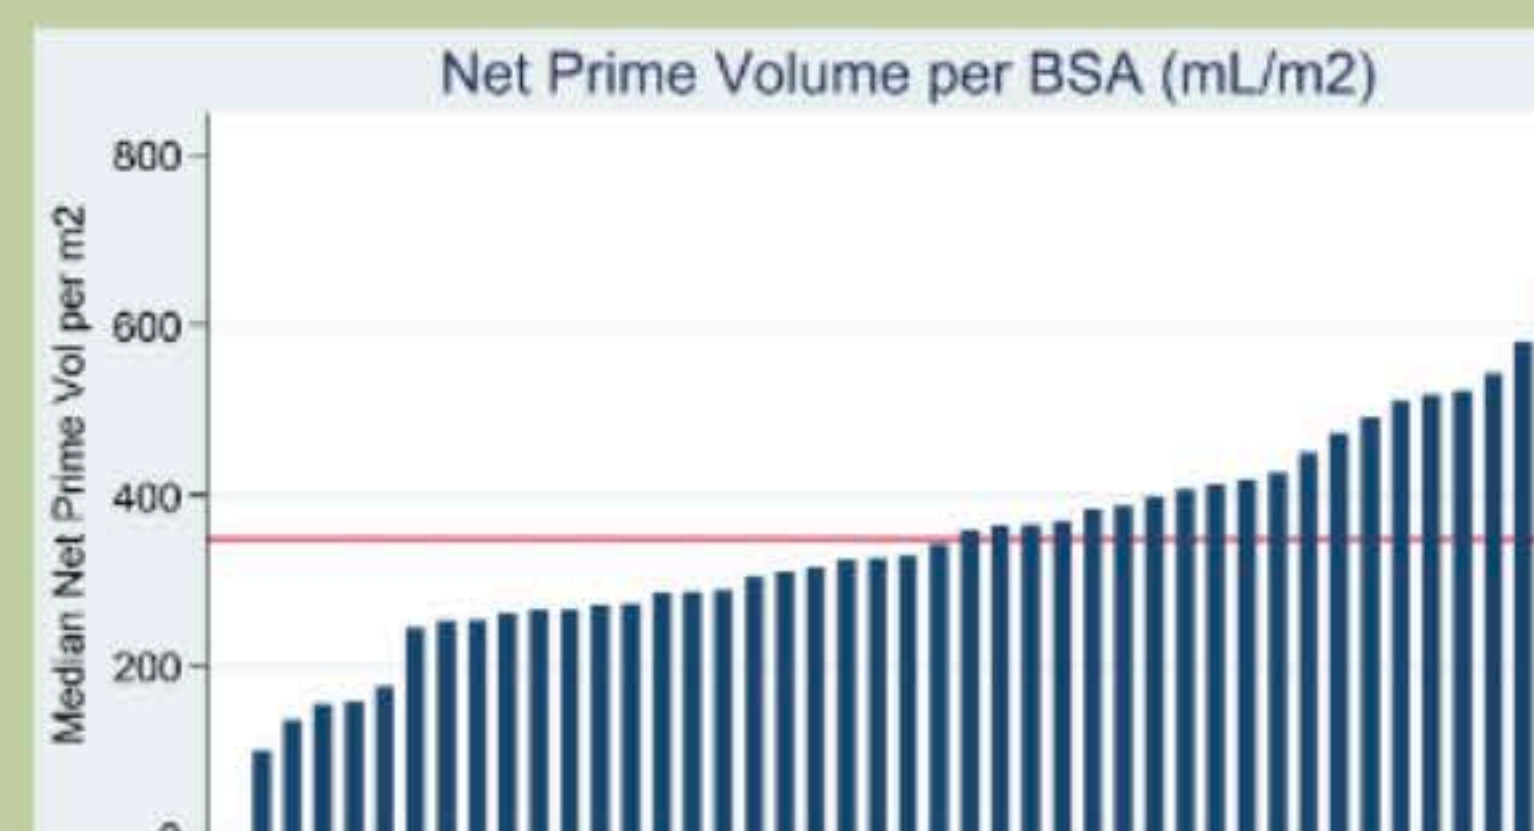

ENGAGEMENT

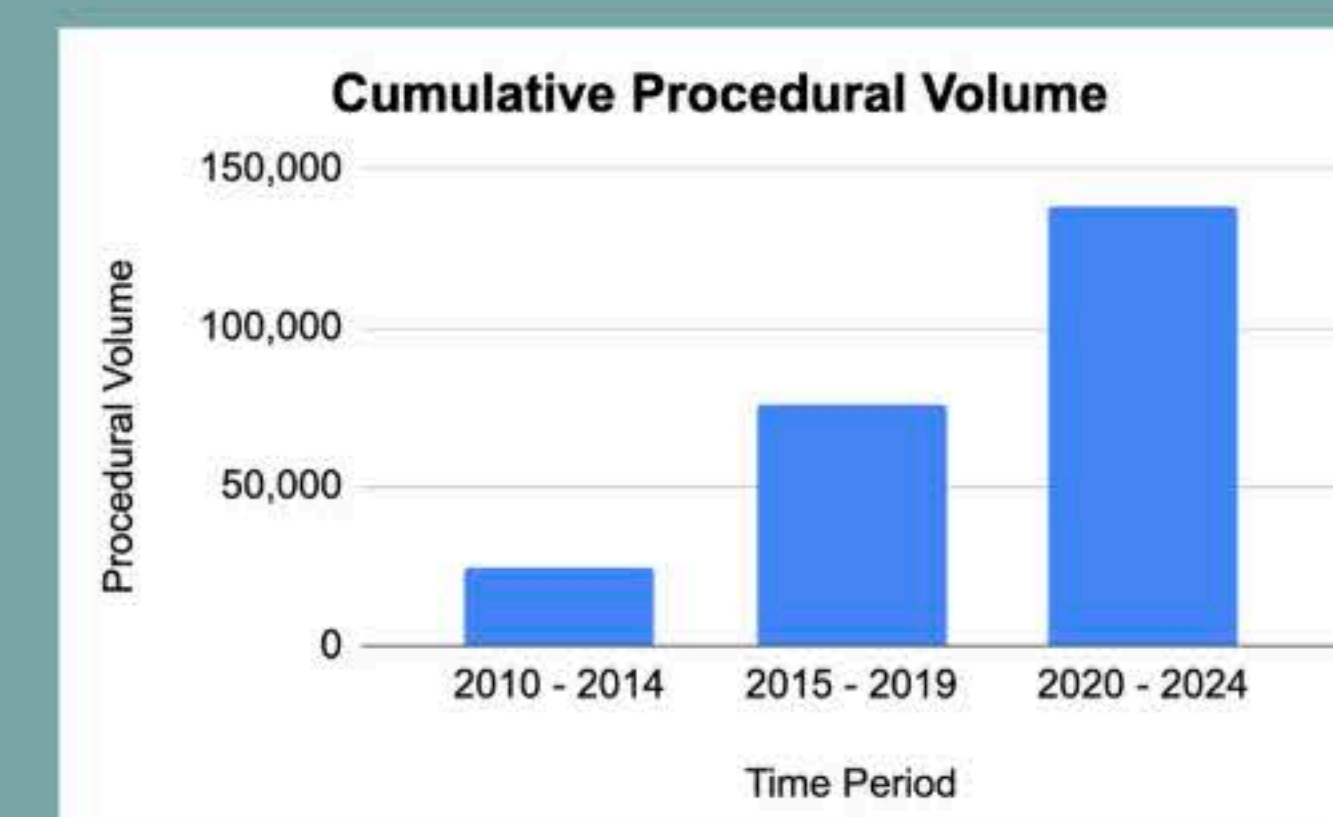

The PERForm registry hosts quarterly collaborative meetings showcasing hospital-level quality and outcomes data.
